

Changing Minds PBS and ATCBS.org, and Community Access Services *in cooperation with* the Region 1 DD Co-op offers:

*Considering Age Related Issues & Dementia
within the context of Brain Function and Behavior*
(Approved for 6 hours of credit)

This sometimes humorous workshop addresses the effects of regulatory depletion, biological, specific neurological and behavioral issues that express themselves in our everyday lives, but have a profound impact on those aging with intellectual and developmental disabilities. This workshop was an invited presentation at the 2018 International Conference on Positive Behavior Support in San Francisco. It served as the “kickoff” to the conference strand on aging.

Kelley Gordham is a Behavior Consultant and three term member of the Board of Directors of the International Association for Positive Behavior Supports (APBS) and Chair of the APBS, Home and Community Supports Network. He has studied the effects of genetics, brain dysfunction and the environment on behavior for the past 24 years. He is a member of the American Academy for the Advancement of Science, APBS, Alzheimer’s Association
